

## Security Enhancement for Online Banking Customers

In an effort to maintain the highest security standards for our Online Banking service, we have made changes to our Transport Layer Security (TLS) protocol. Effective immediately, we are no longer able to support TLS versions 1.0 and 1.1.

To insure that your PC(s) used for our Online Banking service remains compatible with current security standards, please review the following instructions to enable TLS 1.2.

If you have any questions, please contact Deposit Services at 1-800-325-7553.

### How to Enable Transport Layer Security (TLS) 1.2

1. From your internet browser, select **Tools**, then **Internet Options**.
2. Click the Advanced Tab, and scroll down to the **Security** section (Image 1).
3. Ensure TLS 1.2 is checked, if not, check TLS 1.2 and select **Apply** and **OK** (Image 2).
